beyond training examines the nature of second language teacher development and how
teachers practices are influenced by their beliefs and principles it seeks to move
discussion of language teacher development beyond the level of training which reflects
a technical view of specific teaching practices instead it takes a more holistic
approach to teacher development built on the notion of the teacher as critical and
reflective thinker the argument pursued throughout is that teacher education needs to
engage teachers not merely in the mastery of techniques but in an exploration of the
knowledge beliefs and attitudes that underly their teaching practices
